

PTCE

Units. Drug facts. Federal limits. Safety.

01 Calculate with matching units

Liquid volume (mL) = dose (mg) ÷ concentration (mg/mL). Convert units first; mg ÷ (mg/mL) leaves mL. ¹

Quantity = units/dose × doses/day × days. Changing regimen? Calculate each phase, then add the quantities. ¹

02 Federal refill ceilings

Schedule II: no ordinary refills. A legally permitted partial fill is not the same transaction as a refill. ²

Schedule III-IV: at most five authorized refills within six months after issue; prescriber authorization may allow fewer. ²

Keep going with the full quick sheet.

6 more focused sections: Drug -> class / Form changes handling / Glargine: long-acting, never frozen / Diet and duplicate ingredients / Recall class = risk severity / Error is not injury.

Full PDF + phone image: \$2.99 one-time

Included at no extra charge with the matching paid exam purchase.

Selective study prompts, not a complete syllabus or patient-care guidance. Check permitted exam materials separately.
